

# JOIN THE MOVEMENT *for* ANIMAL RIGHTS

**ANIMALS FEEL, LOVE AND SUFFER JUST LIKE US. LET'S CREATE A WORLD FREE OF OPPRESSION, VIOLENCE AND EXPLOITATION.**

We have created a world that uses other animals for human gains: for food, clothing, sport and leisure, heavy work, entertainment, testing for science, medicine and products; and as 'pets'.

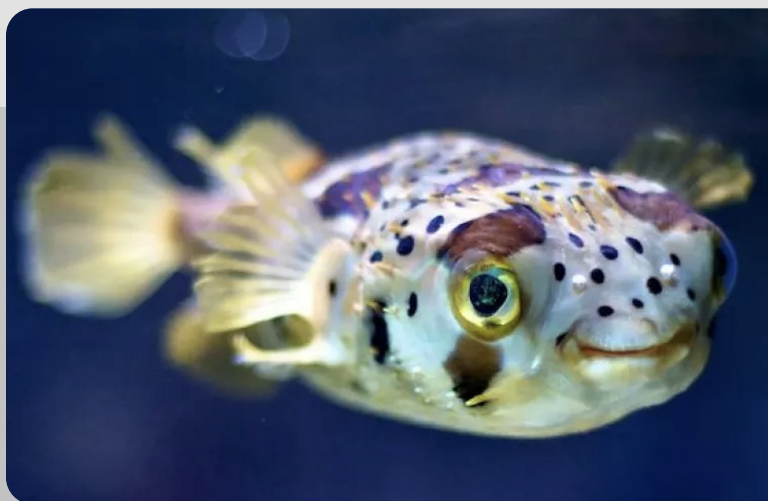

But animals are not commodities or property. They are unique individuals who experience joy and suffering, pleasure and pain. They have families, friends and complex social structures. They are aware of the world around them - their lives matter to them.

Veganism and animal rights are built on the values of respect and justice and on the premise that all animals have the inherent right not to be bred, used, exploited, displaced or killed for our gain.

Our moral stance must not be dictated by culture, convenience or tradition. The history of humankind is rife with practices that we once found acceptable but now see as immoral and unethical. The oppression of other animals is not only morally wrong...

... it is also having a huge detrimental impact on the planet. Animal agriculture is one of the leading contributors to the climate crisis, loss of habitat, mass extinction, land and water depletion and human food shortages.

Respect everyone's right to life, freedom and bodily autonomy. Demand justice for all. Align your way of life with your values.

Go vegan.
